The White Cross Offshore Windfarm is a new development proposed for the Celtic Sea that will generate electricity and help the UK become energy independent. The proposed project will lie 32 miles from the north coast of Devon. The cabling will reach land at the north end of Saunton Sands and will then be routed underground to a substation at East Yelland.

Come to one of our three drop-in sessions to meet the team, find out more and give us your views. The events are free and open to all, there is no need to register in advance.

The consultation is open from Tuesday 21st May until Tuesday 11th June.

If you are unable to attend any of our events, please visit [whitecrossoffshorewind.com](https://www.whitecrossoffshorewind.com) for further information. We will publish all materials on the website when the consultation opens, and you will be able to submit your feedback via email at feedback@whitecrossoffshorewind.com
